

AMENDMENTS TO THE SPECIFICATION

Please replace paragraph [0016] with the following amended paragraph:

[0016] The breaker material may be substantially any material that does not adversely interact or chemically react with the encapsulation coating to destroy its utility. The breaker material can comprise, for example: enzymes such as ~~hemicellulose~~ hemicellulase; oxidizers such as sodium or ammonium persulfate; organic acids, such as citric acid; chelating agents, such as EDTA; and, mixtures of two or more materials and the like.
